

Protect Your Investment

By choosing Linkcare you can rest assured that you will receive high quality customer service as well as comprehensive coverage for your Home Comfort System. A Linkcare plan protects your HVAC system against unexpected repair bills.

What is Linkcare?

Linkcare is a convenient and affordable plan that covers unexpected repairs for your home comfort system

Linkcare provides comprehensive protection against repair bills for a five year period. The program supplements the manufacturer's parts warranty to cover costs of labour, refrigerant, and materials not covered by equipment manufacturer's warranties.

The price for Linkcare varies by product, but averages only pennies a day.

If your home is sold, Linkcare is fully transferable to the new owner at no cost.

Linkcare does not cover routine maintenance, failure due to neglect, cosmetic damages, or non operating components.

The Linkcare extended protection plan will be void if annual maintenance is not performed. Annual maintenance plans are available separately.

To take advantage of Linkcare extended warranty you must purchase warranty coverage within 90 days of equipment installation. Your Linkcare protection certificate will be issued by mail, usually within 2 weeks.

As a Linkcare customer, if you need repairs, call Link Heating and Air Conditioning Limited to schedule a service call. After the repair is completed relax in comfort!

Link Heating and Air Conditioning Limited has been providing quality service and installations for over 39 years
